Displays

Radio Zeeland DMP has its own line of high brightness displays. The Radio Zeeland DMP displays are high brightness transfective screens. The screens can be dimmed up and down from 0 - 100%.

Displays can be delivered optically bonded behind a glass sheet, or mounted within a metal frame.

Touch screen

All displays can be fitted with projected capacitive touch screen controls if desired. Precious space on the dashboard can be saved by adding a touch screen, because there will be no more need for pointer devices.

Sizes

The following display sizes are available with the Radio Zeeland DMP display panels.

- 10" - 19"
